EDUCATION

University of North Texas

Aug. 2022 – Dec. 2026

B.S. in Computer Science, Minor in Mathematics / GPA: 4.0/4.0

Denton, TX

- **Honors: Hack Well Hackathon Winner** (Biometric Monitoring AI); **President's List** (every semester) and **UNT Excellence Scholarship** recipient for sustained top-of-class academic standing.
- **Certifications: NSA/DHS National Center of Academic Excellence in Cyber Defense (CAE-CD)**; Undergraduate Academic Certificate in **Artificial Intelligence and Machine Learning**.
- **Certifications (In Progress): CompTIA Security+, Cisco CCNA, and Claude Certified Architect (CCA), Foundations** — expected Jul–Aug 2026.
- **Relevant Coursework:** Distributed Systems, Cloud Computing, Database Security, Machine Learning, Analysis of Algorithms, Linear Algebra, Multivariable Calculus, Discrete Structures.

RESEARCH AND WORK EXPERIENCE

IT Security Assistant

May 2024 – Present

University of North Texas

Denton, TX

- Maintained and secured IT assets across **7 colleges** using **Rapid7, CrowdStrike, and Microsoft Azure**, ensuring endpoint compliance and continuous vulnerability monitoring across **1,000+ endpoints**.
- Administered **identity and access management** through **Active Directory** for staff and students across **7 colleges**, provisioning and auditing permissions under a least-privilege model.
- Managed **software licensing** for multiple applications college-wide, tracking renewals and optimizing allocation to maintain compliance and control cost.
- Accelerated **patch deployment by 40%** with automated remediation scripts in **Python and Bash**, reducing the exposure window on critical endpoints.

Undergraduate Research Assistant

Jan. 2025 – Present

Oluwadare CompBio-AI Lab, UNT — UR2PHD Program

Denton, TX

- Selected for the competitive **UR2PHD** research program and mentored by a PhD researcher in UNT's **Oluwadare CompBio-AI Lab**, contributing to a **deep-learning splice-site prediction** system for genomic RNA sequences.
- Built and trained **Convolutional Neural Networks (CNNs)** in **Python** with **TensorFlow and Keras** to classify **donor (GT) and acceptor (AG) splice sites** from one-hot-encoded nucleotide sequences, improving accuracy for downstream **alternative-splicing analysis**.
- Engineered the data pipeline with **NumPy** and **Pandas** to clean and encode genomic sequence datasets, and **containerized training and inference with Docker** for fully reproducible, portable runs across lab environments.

PROJECTS

GaitVision — AI Gait-Analysis Capstone | Kotlin Multiplatform, TensorFlow Lite, ML Kit, SQL

2025

- Built a **cross-platform mobile app** that analyzes human gait from video using **TensorFlow Lite** and **ML Kit** to support physical-therapy and **rehabilitation** assessment.
- Migrated **9,500+ lines** of logic to **Kotlin Multiplatform**, enabling full logic reuse for AI pipelines across Android and iOS.
- Secured sensitive patient telemetry with **AES-256 encryption** and **Argon2 hashing**, and optimized on-device **ML inference by 20%**.

cf_ai_mentor — AI Technical Interview Coach | Cloudflare Workers AI, Llama 3.3 70B, TypeScript

2025

- Built an **edge-native AI interview coach** running entirely on **Cloudflare Workers AI**, streaming **Llama 3.3 70B** responses over SSE.
- Engineered stateful session memory with **Durable Objects** and orchestrated multi-step mock interviews via **Cloudflare Workflows**, with **voice input** through the Web Speech API.

JWK-Shield & JWK-Vault — Secure Authentication System | Python, JWT, Azure, SAST/DAST

2026

- Engineered robust identity management and authentication APIs leveraging **JSON Web Keys (JWK)** and **JWTs** for secure token validation.
- Integrated automated security testing pipelines, employing **SAST and DAST** methodologies to proactively identify and mitigate vulnerabilities.
- Designed and deployed cloud-native architecture on **Azure**, strictly adhering to security-first software engineering principles and secure protocols.

SKILLS

Languages: Python, JavaScript, TypeScript, Java, Kotlin (KMP), SQL, C++.

AI / ML & NLP: PyTorch, TensorFlow, scikit-learn, Hugging Face, LangChain, OpenCV, LLMs (Claude, GPT, Gemini, Llama).

Full-Stack & Cloud: React, Next.js, Node.js, Flask, PostgreSQL, MongoDB, AWS, Azure, Cloudflare Workers.

Security & DevOps: OIDC / JWKS, AES-256, Argon2, Rapid7, threat modeling, SAST/DAST, Docker, Kubernetes, CI/CD, Git / GitHub Actions.
